

Ryan Thompson

2025 S Phillipi St
Boise, ID 83705
rt75272@gmail.com
(720)541-2541

EDUCATION:

- **Master of Science in Artificial Intelligence and Machine Learning** *December 2023 - June 2025*
Colorado State University Global
- **Bachelor of Science in Computer Science** *August 2016 - June 2021*
Boise State University
- **Graduate Certificate in Cyber Security** *July 2025 - August 2026*
Colorado State University Global
- **Certificate in Data Science** *August 2019 - June 2021*
Boise State University

WORK EXPERIENCE:

- **AI Data Moderator** *August 2026 - Present*
Centific
Executed precise data collection protocols by strictly adhering to physical planograms to capture accurate environmental data for machine learning analysis. Gathered, processed, and annotated high volumes of raw information, transforming it into structured, high-quality datasets used to train and refine AI models. Maintained rigorous quality control standards throughout the moderation process by identifying anomalies and ensuring all inputs met strict engineering specifications, effectively bridging the gap between physical retail layouts and digital AI systems.
- **Web Developer** *January 2024 - Present*
Contract
Some of my work includes designing and deploying an interactive, age-appropriate educational website for 6th-grade students, focusing on user engagement and accessible UI/UX. Managed full-cycle web development projects for freelance clients, handling everything from initial requirements gathering and scope definition to final deployment. Delivered custom, responsive web solutions while independently balancing strict contract deadlines, technical troubleshooting, and ongoing client communications.
- **Research Assistant** *March 2021 - June 2022*
Boise State University
At BSU's Computational Biosciences Research Lab, I played a pivotal role in optimizing machine learning algorithms for biomedical imaging. My primary focus was on utilizing Python and TensorFlow to enhance image segmentation accuracy while managing extensive datasets. This experience allowed me to deepen my expertise in machine learning and data management within a research-driven environment.
- **Testing Associate** *November 2024 - March 2025*
Lionbridge Games
In my role at Lionbridge Games, I worked closely with Meta developers to enhance the gaming experience of Batman Arkham Shadow. My responsibilities included testing and improving new challenge maps and features, ensuring that post release updates were effective and user friendly. This collaborative effort not only resolved bugs but also contributed to the game's overall success.
- **Operations Manager/Sales Associate** *January 2013 - August 2016*
Performance Bicycles
Responsible for driving sales growth, optimizing inventory management, and overseeing daily store operations. Managing store inventory was a key focus, ensuring optimal stock levels, minimizing shrinkage, and coordinating with suppliers. Additionally, I led a team of employees, providing training, scheduling, and performance management to create a motivated and customer focused work environment.
